ABSTRACT

Data on enrollments, personnel, and finances in Michigan's 29 community colleges are presented in this report. Following introductory material on the development of the data book and an executive summary of major trends, 44 tables are presented focusing on instructional information (e.g., enrollment trends by college and instructional activity, prisoner education data, and enrollments by curriculum area); personnel activity ratios and percentages; total college revenues; general fund college expenditures; and Fiscal Year (FY) 1983-84 non-general fund and general fund instructional activities. Highlighted findings include the following: (1) since 1978, Michigan community college tuition increased steadily, from $569 in 1978-79 to $926 in 1982-83; (2) in 1982-83, community college tuition in Michigan was 54% above the national average; (3) between 1978-79 and 1982-83 state appropriations per community college student decreased from $1,149 to $1,025; (4) in 1978-79, Michigan's local support per community college student was 63% higher than the national average; by 1982-83, it exceeded the national average by 106%; and (5) of Michigan general fund expenditures, 53% is spent on instruction, 12.1% is spent for instructional support, 10.7% is spent for student services, and just under 10% is spent for institutional administration. ACKNOWLEDGMENTS

This publication was made possible by the efforts of many individuals including personnel from each of Michigan's 29 community and junior colleges who completed the various Activities Classification Structure (ACS) reports. Warren Phillips and Mary Jansen of the Michigan Department of Education are to be thanked for their continuing data processing support, as is Gerald Bugenski, Treasury Department, who facilitates data entry into LEGICOM. Robyn Sutfin is to be commended for her patience and expertise as she provided secretarial assistance for this Data Book.

HOW TO OBTAIN ADDITIONAL INFORMATION

Requests for additional information about the Activities Classification Structure and this ACS Data Book should be directed to either Loretta Grobe (517/373-3360) or Ronald Root (517/373-3820), Michigan Department of Education, Higher Education Management Services, Box 30008, Lansing, Michigan 48909.

INTRODUCTION

This Activities Classification Structure (ACS) Data Book is the third annual publication of ratios and percentages derived from information submitted by Michigan's twenty-nine community colleges. The annual community college appropriations act assigns primary responsibility for data collection to the Michigan Department of Education. Act 419, P.A. 1978, mandated the development of the current data base, which is required to be fully compatible with the Michigan Manual for Uniform Financial Reporting.

The fiscal year 1984-85 appropriations act (Act 117, P.A. 1984) was based on data contained in last year's Data Book, and it is expected that the information contained in this publication will provide the basis for appropriations decisions for fiscal year 1985-86. The information is also useful for comparisons between colleges on a number of significant issues which relate to institutional policies. Questions regarding size of physical plant, revenue sources, expenditure levels, staffing patterns and many others may be answered by inspecting the charts and tables included within this document.

Data collected and displayed on charts and tables in Sections I-IV of this Data Book describe general fund activities only. An attempt was made this year to ascertain the amount of non-general fund instruction occuring at the community colleges; however, non-general fund revenue and expenditure data were not collected. Section V displays non-general fund enrollment data by instructional activity, subactivity and element for each of the 11 colleges that submitted such data, as well as the state total. Section VI contains the same data display for general fund instruction, and includes data for each college as well as the state total.

Users of this Data Book should be aware of certain definitions. Specifically, a fiscal-year equated student (FYES) means 31 semester credit hours. (The credit hours for colleges operating on a term basis have been converted to semester credit hours in this Data Book.) Also, a student contact hour (SCOH) is defined as 50 minutes of instruction. An appendix is included which contains a Michigan map showing the location of each community college. It also contains activity classification structure definitions.

MICHIGAN COMMUNITY COLLEGE FY 1983-84
ACTIVITIES CLASSIFICATION STRUCTURE (ACS) DATA BOOK

EXECUTIVE SUMMARY

Tuition and Fees

Michigan and national tuition trends per student are displayed on Chart 1, which shows that since 1978 Michigan's community college tuition has increased steadily. In 1978-79, Michigan tuition was 30% greater than the national average; by 1982-83, it had become 54% greater than the national average. In 1978-79, Michigan's average community college tuition was $569 and increased to $926 in 1982-83, while the national average tuition was $439 in 1978-79 and increased to $600 in 1982-83.

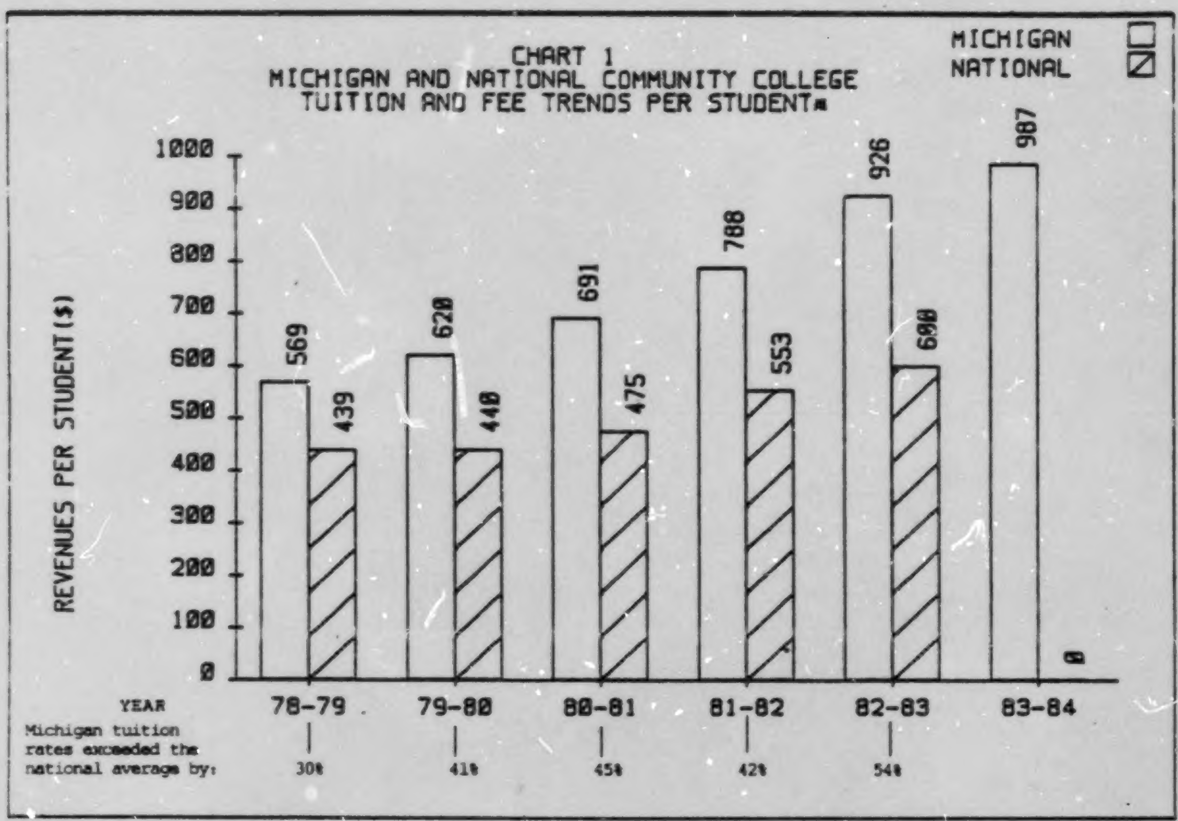

CHART 1

TUITION AND FEE TRENDS PER STUDENT*

*State figures are mean averages per fiscal-year equated student (FYES); national figures are medians per full-time equated (FTE) student.
Source: National Association of College and University Business Officers (NACUBO).

State Appropriations

While Michigan community college tuition rates have been steadily increasing since 1978, Chart 2 reveals that state appropriations to community colleges (per student) have been steadily decreasing. In 1978-79, Michigan state appropriations were 81% of national average appropriations; Michigan's percentage decreased to 61% in 1982-83. The state appropriation (per student) dollar amount for Michigan ranged from $1,149 in 1978-79 to $1,025 in 1982-83; the national range was from $1,049 in 1978-79 to $1,687 in 1982-83.

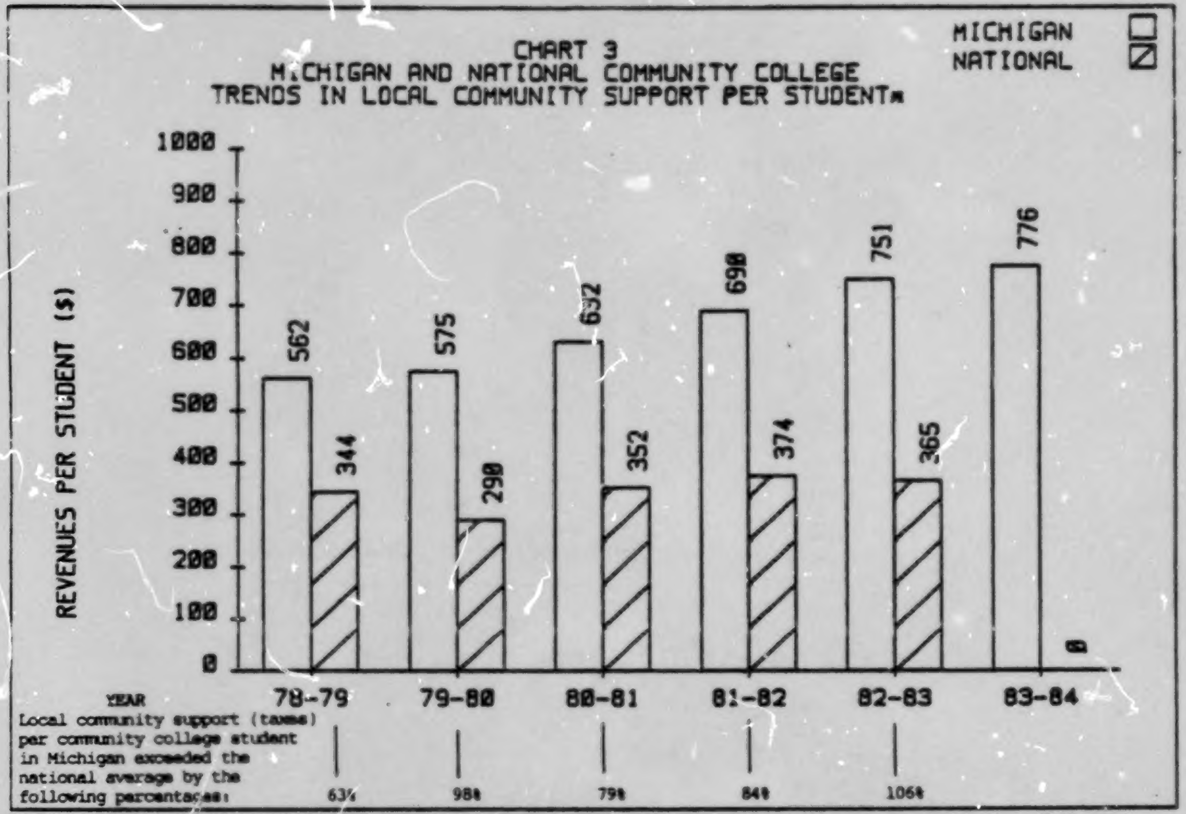
Local Taxes

To offset decreasing state appropriations per community college student since 1978-79, local taxes increased. As displayed in Chart 3, Michigan's local support per community college student was already 63% higher than the national average in 1978-79; by 1982-83, it exceeded the national average by 106%. Dollar amounts for local support in Michigan ranged from $562 per fiscal-year equated student (FYES) in 1978-79 to $751 in 1982-83. Nationally the figures ranged from $344 per full-time equated (FTE) student in 1978-79 to $365 in 1982-83.



*State figures are mean averages per fiscal-year equated student (FYES); national figures are medians per full-time equated (FTE) student.

General Fund Revenue Sources

Chart 4 illustrates the relative share of each general fund revenue source and reveals that, in Michigan, between 1978-79 and 1983-84 state appropriations for community colleges decreased 11.5% (from 48.4% to 36.9%); tuition increased 8.5% (from 23.9% to 32.4%); and local taxes increased 1.8% (from 23.9% to 25.5%).

BEST COPY

General Fund Expenditures

Chart 5 depicts that of Michigan community college general fund expenditures, more than half (53%) is currently spent on instruction, and another 12.1% is spent for instructional support. In addition, 10.7% is spent for student services. Just under 10% is spent for institutional administration and less than 1% is spent for public service. Physical plant operation utilizes 13.6% of the general fund.

Enrollments (1968-1984)

In 1967-68, a total of 51,972 fiscal-year equated students (FYES) were enrolled in Michigan community colleges. By 1983-84, a total of 124,290 FYES were enrolled. Chart 6 displays the number of FYES, by year, between and including 1967-68 and 1983-84.

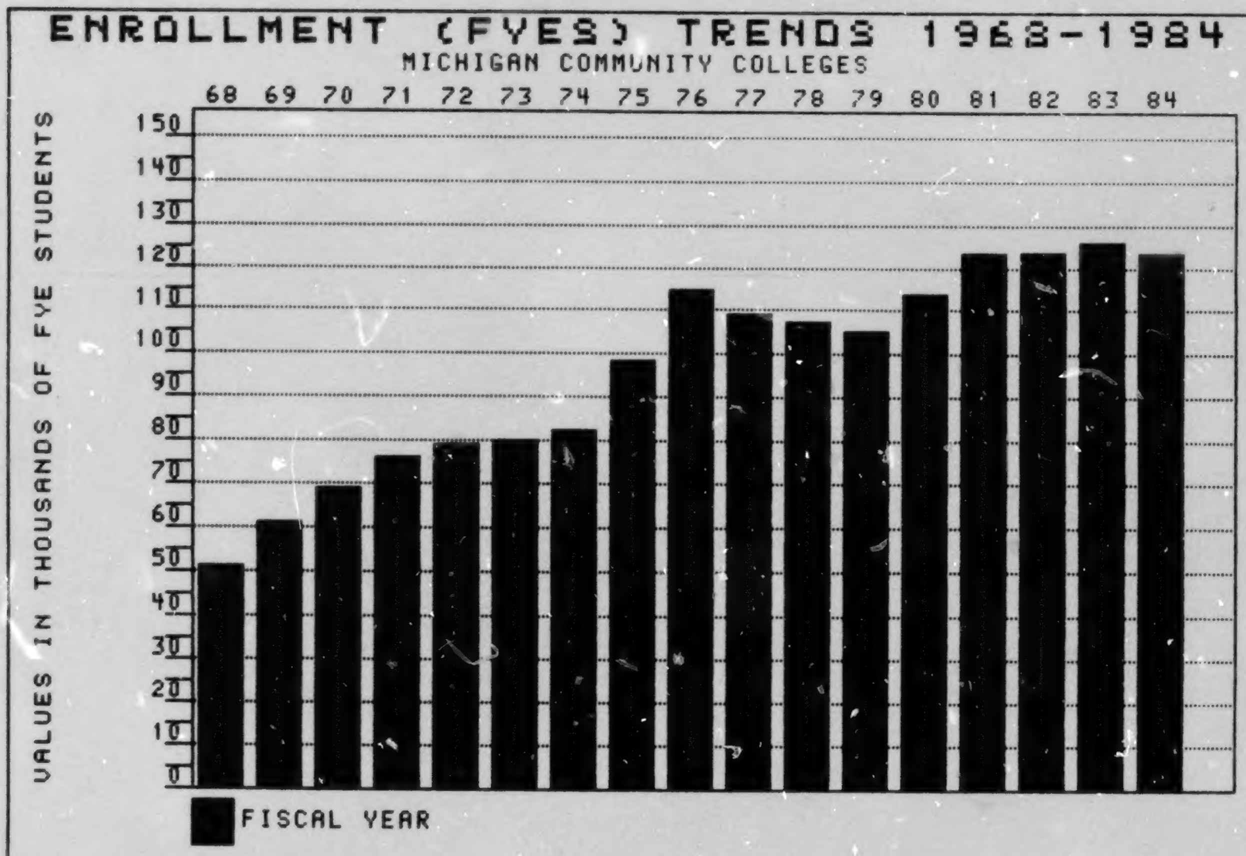

CHART 6

Notes:
(1) One FYES = 31 semester credit hours.
(2) Prior to 1981-82. enrollments in avocational courses were excluded.
(3) Exact FYES for the years included on Chart 6 are as follows:

1967-68	51,972	1976-77	109,750
1968-69	61,852	1977-78	108,243
1969-70	70,422	1978-79	106,042
1970-71	77,343	1979-80	115,443
1971-72	79,507	1980-81	123,618

Note: By definition, a semester credit hour must not be less than 800 instructional minutes. Since one course contact hour is 50 minutes of student instruction, a minimum of 16 course contact hours is necessary to generate one semester credit hour. A ratio of 1.00 (or 1:1) indicates that the minimum instructional time exists for that instructional activity.

Activity Definitions

(1.0) INSTRUCTION

The Instruction Activity includes those activities carried out for the expressed purpose of eliciting some measure of educational change in a learner or group of learners. "Educational change" is defined to include (1) the acquisition or improved understanding of some portion of a body of knowledge; (2) the adoption of new or different attitudes, and (3) the acquisition or measured mastery of a skill or set of skills. The activities that may be carried out to elicit these educational changes include both teaching activities and facilitating activities. The instruction activity includes both credit and non-credit instructional offerings.

Course offerings should be classified into element classifications on a course level. The determination of the classification of instructional offerings into activity elements is based upon the basic and primary institutional reason for offering the courses. Briefly stated, the Activities Classification Structure recommends defining activity elements on the basis of an aggregation of groups of courses of similar subject matter rather than on the basis of the aggregation of instructional offerings that can be applied toward a particular degree or certificate, or what is commonly called a program.

Thus, the subject matter of any course activity determines its element classification.

Instructional offerings in which previously acquired skills or knowledge are used in a specific and exclusive application are defined as applied courses (activities). The subject matter of the area of application determines the classification of applied courses. Applied courses are differentiated from courses in which the learner acquires such basic knowledge or skill, which are classified in that activity element reflecting the basic knowledge or skill area. For example, a business communications course is classified as "communications" (Activity Element 1.12) when the skill to be mastered is primarily communications and not business subject matter.

(3.0) PUBLIC SERVICE ACTIVITY

The Public Service Activity includes those program activities established to make available to the public the various unique resources and capabilities of the institution for the specific purpose of responding to a community need or solving a community problem. This program includes the provision of institutional facilities, as well as those services of the faculty and staff that are made available outside the context of the institution's regular instructional program.

(4.0) INSTRUCTIONAL SUPPORT ACTIVITY

The Instructional Support Activity includes those activities carried out in direct support of the Instructional program. The activities that should be reported in this activity classification include (1) activities related to the preservation, maintenance, and display of both the stock of knowledge and educational materials (for example, library services and museums); (2) activities that directly contribute to the way in which instruction is delivered; and (3) activities directly related to the administration of instructional programs.

The activities that should be classified in the Instructional Support Activity differ from those classified in the other support programs in that they are carried out in direct support of the Instruction program. While some activities of the Student Service program may contribute indirectly to the institution's instructional objectives, they are generally considered to be a supplement to the Instruction program rather than a direct contributor to its objectives. The Institutional Support Activity, on the other hand, is primarily concerned with the institution as an operating entity and tends to focus on the institution as a whole rather than upon individual programs.

(5.0) STUDENT SERVICE ACTIVITY

The Student Service Activity includes those activities carried out with the objective of contributing to the emotional and physical well-being of the students, as well as to their intellectual, cultural, and social development outside the context of the institution's regular instruction program. Activities classified here attempt to achieve this objective by (1) expanding the dimensions of the student educational and social development of providing cultural, social, and athletic experience; (2) providing those services and conveniences needed by students as members of a student body; (3) assisting students in dealing with personal problems and relationships, as well as their transition from student to member of the labor force; (4) administering a program of financial support for students; and (5) recruiting and admitting students to the institution's educational program.

(6.0) INSTITUTIONAL ADMINISTRATION ACTIVITY

The Institutional Administration Activity consists of those activities carried out to provide for both the day-to-day functioning and the long-range viability of the institution as an operating organization. The overall objective of the Institutional Administration Activity is to provide for the institution's organizational effectiveness and continuity. It does this by (1) providing for planning and executive direction, (2) providing for administrative and logistical services, and (3) enhancing relationships with the institution's constituencies.

(7.0) PHYSICAL PLANT OPERATIONS ACTIVITY

The Physical Plant Operations Activity consists of those activities related to maintaining existing grounds and facilities, providing utility services, planning and designing future plant expansion and modifications, and health and safety services.

MICHIGAN STATE BOARD OF EDUCATION
STATEMENT OF ASSURANCE OF COMPLIANCE WITH FEDERAL LAW

The Michigan State Board of Education complies with all Federal laws and regulations prohibiting discrimination and with all requirements and regulations of the U.S. Department of Education. It is the policy of the Michigan State Board of Education that no person on the basis of race, color, religion, national origin or ancestry, age, sex, marital status or handicap shall be discriminated against, excluded from participation in, denied the benefits of or otherwise be subjected to discrimination in any program or activity for which it is responsible or for which it receives financial assistance from the U.S. Department of Education.
